

# Muhammad Talha Saeed

SOFTWARE ENGINEER

## CAREER SUMMARY

To secure a position as Software Engineer where I can efficiently contribute my skills and abilities to the growth of the organization and build my professional career.

## EXPERIENCE

### SOFTWARE ENGINEER

#### **Punjab Rural Support Programme Lahore / Oct 2022 to present**

As a Software Engineer at PRSP, I build and manage websites, focusing on a major Angular project for interactive sites. I develop APIs with Dot NET WebCore, handle SQL database tasks, and enhance functionality with React.js. I oversee project maintenance, optimize ERP system performance, assist the CM IT, and deploy websites using IIS.

### FULL STACK DEVELOPER

#### **Evelogics Islamabad / August 2020 to Sep 2022**

During my tenure at Evelogics Islamabad, I actively engaged in various tasks related to my field, consistently delivering results to my manager. I spearheaded the development of a responsive dashboard with Angular, CSS/Bootstrap, Node.js, and Mongoose DB, while also resolving frontend bugs in Flutter applications. Additionally, I designed user interfaces with Firebase authentication using Flutter, contributing to seamless user experiences.

### GRAPHICS DESIGNER

#### **Internship at CT Products (Pvt.) Ltd. / 3 Months**

During my internship at CT Products (Pvt.) Ltd., I specialized in graphic design and digital marketing, creating engaging content for various platforms.

## ACADEMIC PROJECT

Speech Recognition using Artificial Intelligence, University of Agriculture Faisalabad, Pakistan, I have gained experience in making, Speech recognition which is the process of converting spoken words to text, and use voice commands to launch an app and specify an action or command to execute. Python supports many speech recognition engines and APIs, including Google Speech Engine, Google Cloud Speech API.
